RE: Music and Performing Arts Library

The Department of Theatre continues to support strongly the proposal to establish small theatre and dance collections within the new Music Library to constitute a Library of Music and the Performing Arts, with the limitations specified in Mr. McClellan's Report dated April 10, 1972. Such a facility will be extremely useful to theatre students in the practical courses: acting, creative dramatics, costuming, scene design, stagecraft, lighting, sound effects, makeup, play direction, and theatre administration, and in the survey courses in theatre history.

Students concerned with dramatic literature and with research at the graduate level will continue to use the collections in the main Library.
